Honored Members of the Connecticut Legislature:

During the past several weeks the issues of bottled water and plastic and transparency in permitting have become matters of great concern. It is my desire as Mayor and I am sure the desire of the Bloomfield Town Council to alleviate some of those concerns brought to our attention by citizens of Bloomfield and surrounding municipalities.

In the interest of transparency and the public's right to know, I endorse and will recommend to the Bloomfield Town Council to endorse next week, the following bills before the State Legislature in the original versions:

AB422 and SB328.

These bills will allow for full disclosure before public bodies of all businesses and their intended use of Connecticut land, utilities and other resources. It is always in the best interest of every citizen to be assured of the security of our natural resources and the knowledge of any potential harm to our environment.

As such, I, as Mayor endorse, and I am confident that the Town Council of the Town of Bloomfield will endorse, the passing of the above mentioned bills.

Sincerely yours,

Joan A. Gamble

Mayor, Town of Bloomfield
